

INCIDENT RESPONSE SOLUTIONS

eDiscovery and Document Reviews

Do you require an eDiscovery provider who offers scalable solutions?

Our eDiscovery services will resolve your most difficult challenges. As Forensic Technology experts, we can help you improve your processes by using technology to its fullest extent, underpinned by robust, proven eDiscovery processes.

Our eDiscovery services include computer forensics and managed document review. If you need your documents hosted in the Cloud, we can help you.

We have delivered eDiscovery solutions in both Law Enforcement (NZ Police) and Professional Services (PwC). We are happy to provide you with expert witness reports where required.

eDiscovery

We support our clients through all phases of the electronic discovery reference model (EDRM) process.

Our vast experience in using leading eDiscovery technologies ensures you select the right tool for the matter.

We ensure this complex and labour-intensive process is as simple and effective as possible.

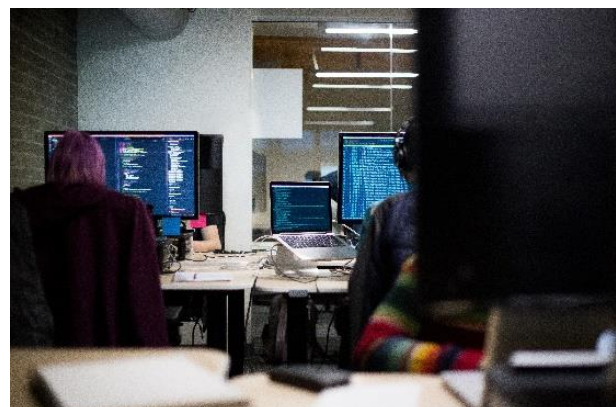

Document Reviews

We provide customised solutions for your document review.

Our extensive forensic experience in collecting and processing vast quantities of data will prepare you for any sized review.

We know how to select and operate advanced review technologies that will meet your expectations.

Why Incident Response Solutions?

Our experts have been providing eDiscovery services in New Zealand since 2002, assisting Government agencies, corporate organisations, and a range of legal professionals. We are qualified to provide a forensic standard of data collection from the following electronic sources:

- servers, workstations and mobile devices
- file, email systems and document management systems
- cloud repositories
- removable media

We will tailor our solution to meet your specific requirements, however we typically process the collected data using leading software such as Nuix and Magnet Axiom, and then work with you to transfer the documents you require into a review tool such as Relativity or Ringtail (including online hosting).

We have the proven experience to assist you in reviewing documents in accordance with the High Court Rules Discovery checklist which requires the use of:

- appropriate keyword searches
- other automated searches and techniques for culling documents (including concept searching, clustering technology, document prioritisation technology, email threading, and any other new tool or technique)
- a method to identify duplicate documents.

What next?

Start by asking yourself the following questions ... and then get in contact with us.

- Are we required to undertake an eDiscovery process, in response to either a regulatory request or litigation?
- Are we undertaking a large review of electronic documents requiring specialised software and expertise?
- Do we require a scalable e-Discovery solution?
- Do we require our provider to operate leading e-Discovery and document review software?
